

CHATHAM COUNTY DISASTER RECOVERY PLAN

**ANNEX E
APPENDIX 10**

DEBRIS MANAGEMENT GOALS

OCTOBER 2011

THIS PAGE INTENTIONALLY BLANK

COUNTY- WIDE DEBRIS MANAGEMENT GOALS OCTOBER 2010

1. Emergency planners are proactive developing and coordinating comprehensive debris management plans as part of their overall emergency management planning efforts;
2. Management and coordination roles are identified and responsibilities assigned for the various debris functions;
3. Debris management plans and operations address/comply with State/Local health and safety standards/requirements;
4. Debris management protocols include assumptions for various events, including debris volume(s) forecasting and modeling (as appropriate);
5. Procedures for collecting and disposing of vegetative debris are establish and coordinated;
6. Procedures for collecting and disposing of Construction and Demolition (C&D) debris are establish and coordinated;
7. Procedures for collecting and disposing of Personal Property and Household debris are establish and coordinated;
8. Procedures for collecting and disposing of Hazardous Household Waste (HHW) are establish and coordinated ;
9. Procedures for collecting and disposing of Hazardous Waste (HAZMAT) are establish and coordinated;
10. Procedures for collecting and disposing of White Goods are establish and coordinated;
11. Procedures for collecting and disposing of Soil, Mud, and Sand are establish and coordinated ;
12. Procedures for collecting and disposing of Vehicles and Vessels are establish and coordinated;
13. Procedures for collecting and disposing of Putrescent items are establish and coordinated ;
14. Local procedures are established for acquiring required regulatory permits;

15. Potential Debris Management Sites (DMS) locations are identified/designated ;
16. Procedures for operating, managing, and staffing, DMS locations are established and coordinated;
17. Procedures to monitor DMS locations are establish and coordinate;
18. Debris reduction/recycling plans are established and coordinated;
19. Debris management plans and operations comply with environmental protection requirements;
20. Contracting/procurement procedures supporting debris management operations are established and coordinated;
21. Contractors performing work on State and/or Federally maintained roadways are in compliance with FHWA -1273 (Rev. 3-94), See Appendix 11, Debris Field Documents and References;
22. Procedures to remove debris from private property are established;
23. Road clearing priorities are established and coordinated for the initial 70-Hour Debris Push (“Initial Push” and “Cut and Toss” activities);
24. Rosters/lists and supporting documentation are maintained of pre-qualified debris contractors.
